THE W. O. HICKOK MANUFACTURING COMPANY
HARRISBURG, PENNSYLVANIA, U. S. A.

OUR WARRANTY—All machinery and tools are thoroughly inspected by us before shipment. Should any material or machinery made by us prove defective or not as ordered, we will, upon due notice, take it back or replace it, if it is sent to us for inspection; but we will not allow any claim for expense incurred in using or changing such machinery or material. Machinery or tools not manufactured by us are not guaranteed by us.

Hickok Paging and Numbering Machines

A MOST complete machine, with automatic repeating device, automatic alternating device. Thoroughly up to date. All wearing parts made of steel. Simple in design. Easily understood. Heads on half-set, stationary ciphers. Unequaled in printing, light-running, facility of operation.

New Style Reversible Head that Can Operate Forward or Backward

THIS head has been designed and patented for paging. It will print consecutive numbers or alternate numbers forwards or backwards as desired. An operator of a paging machine can readily see the wonderful advantage in this as he can print the even numbered sheets in the same manner as he formerly printed the odd numbered pages, saving at least 200% in time.

We also manufacture a special head to hold type or electrotypes for printing tags, covers and check ends.

Style A, equipped with electric drive

THREE

Paging Head (Regular Design)

TO PAGE a book nicely necessitates the use of a good machine. To number a check, draft, bank bill, or any class of work where careful, perfect numbering is required, makes indispensable a machine and numbering-head which may be depended upon for accurate work. The illustration we give herewith is of just such a machine—perfect in workmanship, of the best material and finest fitting. Please note the points of superiority in our machine:

1—Dust-proof Head. Each head is encased in a dust- and moisture-proof bronze casing. Keeps dust and moisture out, and oil in.

2—Ink-rollers held firmly at the two ends; any other method is a signal failure. They get “lopsided.”

3—Our serial alphabet attachment (automatic) prints a letter close to the unit disc, or any combination of discs printing, and of itself slides back as the several discs, one after another, come into action. A canceling-star may be printed close to the right of the unit disc at the same time.

4—The repeating device is so simple that a child could operate it. The change of a stop from one hole to the next is all that is required.

5—To alternate, namely, 1, 3, 5, 7, or 2, 4, 6, 8, as in paging, requires only the movement of a small stop on the side of the head. like turning a button.

6—Impression Adjustment. The head descends a given distance each impression. The bed-block is adjustable. You can print any thickness of paper or cards without injury to the numbers or machine.

7—Extreme depth back of feed-table, vertically and horizontally, for stiff and flexible sheets of card or paper, where the numbering is near the bottom of the sheet, and the sheet can, therefore, be fed far into the machine.

THE W. O. HICKOK MANUFACTURING COMPANY -:- Harrisburg, Pa., U. S. A.

- 8—Rapid, easy and simple device for raising or lowering the feed-table; feeder need not change her position to operate it.
 9—Long smut-tape, to prevent "set-off" and "smutting" when paging books; feeds automatically and regularly.
 10—The pressure of a child's foot will operate the steam attachment. An impression is made instantly, at the will of the operator, by merely touching a small treadle.
 11—Smooth ink distribution. No clots of ink drawn from a reservoir by the roller, and then spotted on the plate, to the damage of the work.
 12—Disc-setting made easy. On the face of the shank of each figure, as it stands before the operator's eye, is distinctly duplicated the engraved figure then in printing position on the same disc; thus combinations of figures may be set more quickly and accurately than heretofore.

Figures for Numbering and Paging

( Special sizes and styles made to order, but at an additional price.)

Cancellation mark or letter to print after figures with one letter or cancellation mark only	20 00
Extra letters, each	5 00

THE W. O. HICKOK MANUFACTURING COMPANY :- Harrisburg, Pa., U. S. A.

Hickok Book-Backing Machines

ROLLER BACKER

THIS machine combines greater strength and weight than many of the machines having the same general appearance, the extra weight being utilized where the greatest strain is found. The weight of movable parts is so counterbalanced that the hard labor experienced by those using the ordinary roller backer is done away with. The machine will easily clamp any book the jaws will receive, without springing the foot-levers. The springs used on this machine are of the finest tempered steel. Nothing but the best of steel and iron is used in the working parts.

The workmanship is of the best, and we offer this machine to the trade as one which will meet their approval. Length of jaw, 18 inches.

PRICE, \$950

Crated, f. o. b. cars, Harrisburg, Pa. Weight, about 1,475 pounds.
Floor-space, 3 feet by 3 feet 6 inches.

JOB BACKER

NEW pattern, heavy frame, steel screw, gun-metal nut, jaws accurately aligned with each other, and finished in superior manner. This machine is useful for backing and sawing out books.

SIZES AND PRICES

Jaws 21 inches long, open $4\frac{1}{2}$ long. \$125 00
Jaws 29 inches long, open $4\frac{1}{2}$ in. 150 00

Average floor-space, 31 x 22 inches. Average weight,
550 pounds. Boxed, f. o. b. cars, Harrisburg, Pa.

Hickok Automatic Knife-Grinder

EMERY WHEEL. The Emery Wheel used on this machine is of the best make, and of a grade of emery especially adapted to the work. The wheel is kept wet by water from a drip-can placed on top of the hood. The application of water is a safeguard against the possibility of the temper being drawn from the knife.

ITS CONSTRUCTION. This machine is simple in construction, being devoid of the many parts susceptible to wear and liable to get out of order. Table glides smoothly on gibs; no jar.

ITS FRAME is built of iron and steel, and is strongly braced. Its working parts are

THE W. O. HICKOK MANUFACTURING COMPANY -:- Harrisburg, Pa., U. S. A.

accurately fitted, and by careful experiment it has been made a perfect machine. It will do with accuracy and speed all work required of this class of tools.

AUTOMATIC MOVEMENT. The reversing mechanism applied to this machine is thoroughly automatic and positive in any short or long stroke. There is nothing better. The knife-holder is drawn to position by hand-wheel, and is set to bevel by worm and gear.

SIZE OF EMERY WHEEL, 22 inches diameter, 1½-inch face; size of the two pulleys, each 14½ inches diameter, 2¾-inch face; speed of wheel, 200 r. p. m.; weight of 48-inch machine, crated, about 1,300 pounds; floor-space, 12 feet by 3 feet 9 inches.

**For Sharpening Cutting Machine Knives. Simple in Construction
Will Grind to Any Bevel. Rigid Knife-Bar Holder**

Prices, crated, f. o. b. cars, Harrisburg, Pa.

THE W. O. HICKOK MANUFACTURING COMPANY -:- Harrisburg, Pa., U. S. A.

Binder's Board Shears

(Gauge Table Shears, all iron)

THESSE shears have recently been greatly improved, and we now consider them the finest on the market. The hold-down clamp is vertical-acting, and will hold firmly anything from tissue-paper to the heaviest board. It is rigidly constructed and will show no wear after years of service.

The table or back gauge is always in perfect alignment with the knife, thus saving a great amount of time usually used in adjusting. The front stop or gauge is quickly and easily moved into any position desired, and securely locked by one hand screw only.

Auxiliary Gauge, for cutting extra-narrow strips. New style.

Size, 36-inch Cut. Front gauge runs out from knife 24 inches; table, 24 x 36 inches; floor-space, 6 feet 9 inches by 4 feet 9 inches; weight, crated, about 950 pounds.

Price, \$210, f. o. b. Harrisburg, Pa.

THE W. O. HICKOK MANUFACTURING COMPANY -:- Harrisburg, Pa., U. S. A.

Hickok 00 Standing Press

THIS Press has a frame made of hard-wood, well seasoned and finished, an iron head and platen and a steel screw. Extremely strong and well made throughout. Screw 2 inches diameter.

Size of platen and bed. 13 x 20 inches.

Platen opens 20 inches.

Shipping weight, 350 pounds.

Price. \$75, boxed, f. o. b. Harrisburg, Pa.

ELEVEN

THE W. O. HICKOK MANUFACTURING COMPANY -:- Harrisburg, Pa., U. S. A.

Hickok 00½ Standing Press

THIS Press is made entirely of iron and steel, and is of the highest grade of workmanship.

Size of platen, 10 x 16 inches.

Platen opens 7 inches.

Screw steel, 2 inches diameter.

Shipping weight, 100 pounds.

Price, \$50, f. o. b. Harrisburg, Pa.

Hickok 0½ and 0 Standing Presses

THESE Presses are made entirely of iron and steel and have an accurately cut screw, with bronze nut and are of the best grade of workmanship.

	Size of steel screw	Size of platen	Opens	Weight	Prices, f. o. b. Harrisburg
No. 0½	—2 in.	16 x 24 in.	10 in.	443 lbs.	\$90.00

No. 11—	4 in.	29½ x 45½ in.	56 in.	3,935 lbs.	450 00
No. 12—	4 in.	29½ x 48 in.	56 in.	4,750 lbs.	550 00

Hickok Toggle Presses

THIS Press is very quick and expedient, and is taking the place of the old-fashioned standing presses. The advantage gained is that the nearer the Press is closed the greater the pressure, so that when the Toggle Arms are almost vertical the greatest pressure is attained, and by less applied power, hence the great advantage.

	Size of platen	Open	Closed	Weight	Prices, f. o. b. Harrisburg
No. 2T	24 x 16½ in.	59 in.	45 in.	900 lbs.	\$175 00

THE W. O. HICKOK MANUFACTURING COMPANY -:- Harrisburg, Pa., U. S. A.

Hand-Bundling Signature Press

THIS machine is very useful for bundling printed signatures where a great pressure is not required. It does the work with great quickness and efficiency, and is the most powerful hand-press on the market. It is carefully and accurately made. The workmanship and material are fully guaranteed by us to be first class in every respect.

Floor-space, 5 feet 4 inches by 4 feet 2 inches. Weight, about 1,050 pounds.

Price, \$200, f. o. b. Harrisburg, Pa.

Hickok Stabbing Machines

STYLE G

THIS machine is very desirable for piercing or stabbing pamphlets, etc., in limited quantities by hand power. It is built entirely of iron, and is very strong. Machine is made to fasten to table or bench. Awls are made with round or flat point, and with round shank.

Weight, 70 pounds.

Price, boxed, \$80, f. o. b. Harrisburg, Pa.

STYLE F

THIS is a foot-power machine that is perfect and easily adjusted. The working parts are made of iron and steel, and are very strong. Awls are made with round or flat point, any thickness, and with square shank. The position of the awls can be easily and quickly changed. This machine is not built for heavy work.

Weight, about 275 pounds.

Price, crated, \$150, f. o. b. Harrisburg, Pa.

THE W. O. HICKOK MANUFACTURING COMPANY :- Harrisburg, Pa., U. S. A.

Hickok Combined Lettering Pallet Press, Stabbing and Round Corner Cutting Machine

WE HAVE put this on the market on account of the persistent demand for a Press into which a Lettering Pallet can be quickly and securely fastened. When a few impressions which need pressure are required, the Lettering Pallet can be quickly put in the Press and sufficient pressure gotten without a large outlay for a stamping machine. It also has the stabbing and round corner cutting attachment which can be easily and quickly attached. The stabbing attachment has a holder with nine stationary awls. The awls are spaced 15-16" from center to center. The distance from centers of outside awl to outside awl is 8 7-16".

The extreme distance from line of awls to rear gauge is 10 1/2".

Nine to fifteen sheets of paper can be stabbed at one operation, depending on the thickness of material.

Three Round Corner knives of different curves are supplied.

The Press is equipped with an adjustable stop and guides for the work. No shop is complete without one of these Presses.

Bench space is 11 x 24 inches. Shipping weight about 109 lbs. net, 160 lbs. gross. Size 20 x 15 x 28 inches.

PRICES

Press and Pallet only	\$125 00
Press, Pallet and Stabbing Attachment only	135 00
Press, Pallet, Stabbing Attachment and Round Corner Cutter	150 00

HICKOK ROLLS AND STAMPS

We show below a few of the most popular Rolls and Stamps. We can also supply Gouges, Lines and Embossed Rule. *Kindly order by number which is the first set of figures.* The figures after the price on the plain rolls, represent the thickness of the line in thousandths of an inch. When the line is double or triple, the first figure represents the width of the upper line, the second the space between the lines and the third the width of the lower line, etc.
